65 Series Beside-the-Press Granulators

Optional staggered rotor expands machine versatility and allows optimized processing of engineered polymers and difficult product forms.

Optional sound enclosure for 75 to 80 dBA operating noise levels.

The standard 3-knife open, scooped wing rotor provides application flexibility.

High-capacity vacuum bins to suit customer's extraction equipment with optional high-level sensor and alarm.

Unmatched Versatility and Precision Low Speed Granulation

Providing efficient and versatile granulation for a variety of applications, the 65 Series can be used with robot feed, conveyor feed, or hand feed operations. 65 Series granulators provide maximum cutting efficiency with their low speed, 3-knife

open rotor design. With cutting knives manufactured from D2 HCHC and heat-treated with proprietary process, the 65 Series handles virtually all types of molded plastics scrap.

65 Series Beside-the-Press Granulators

Standard Features

- Multi-feed hopper suitable for manual, conveyor or robot loading. Top section is reversible for easier feeding of long runners
- Innovative flap assembly specifically designed to be removed quickly and easily
- Bolted and doweled cutting chamber assembly with outboard, sealed-for-life bearings
- Three-knife, open rotor with scooped wings and slant-cut knives
- Counter-slanted stationary knives provide true "scissor" cutting action
- All knives manufactured from D2 HCHC and heat treated using Cumberland's proprietary process
- Rotating end discs for low heat granulation and reduced friction wear
- High-inertia flywheel with automatic drive belt tensioning
- TEFC motor and NEMA Type 12 enclosure
- Safety interlocks, push buttons, safety labels and monitoring device
- 3 HP belt drive

Available Options

- Motor:
- 5 HP
- Rotor and Cutting Chamber:
- Staggered-knife, open rotor with wedge-held "cassette" knives
 - Wear-resistant rotor, screen and chamber components
- Discharge:
- Compressed air venturi system
- Machine:
- Complete sound enclosure

Qualified For Many Applications:

- Injection-molded runners and reject parts
- Small blow-molded parts and tops-tails
- Small extruded tubes and profiles
- Edge trims from sheet extrusion
