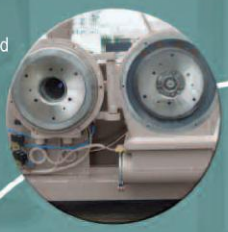
CPM Series Impact Pulverizer

Two-piece design allows outer rings to be removed and replaced without dismantling the machine



Perfect for medium hard, impact resistant and friable materials

New bearing design eliminates need for counter-rotation and extra drive motors

Engineered to eliminate temperature surges and increase throughput

CPM Series Pulverizers Engineered For Impact-Resistant Materials

The CPM Series Pulverizers are engineered to eliminate temperature surges and increase throughput with its small grinding chamber cross section and vertical grinding discs. Our pulverizers contain new bearing technology that eliminates the need for counter-rotation and extra drive motors. The two-piece design brings easy maintanence for the outer rings, allowing them to be removed or replaced without having to dismantle the machine.

CPM Series Impact Pulverizer

Standard Features

- High speed precision pulverizing of medium hard, impact resistant and friable materials
- Grinding rings allow gap adjustment to a fineness of less than 1000 mm without a screen
- Grinding rings can be resharpened several times
- 110-4400 lbs./hr. throughput
- High peripheral speeds and highly effective crushing ensure low drive power and high throughputs
- Small grinding chamber cross section
- Vertical grinding discs
- Two-piece design reduces maintenance time
- New bearing technology eliminated the need for counter-rotation and extra drive motors

Specifications			
Model	**CPM 300**	**CPM 500**	**CPM 800**
Diameter of discs, in. (mm)	11.8 (300)	19.6 (500)	31.5 (800)
Drive capacity, hp (kW)	30 (22)	75 (55)	120 (90)
Approximate Weight, lbs. (kg)	2645 (1200)	4188 (1900)	7054 (3200)
Approximate Throughput, lbs./hr (kg/hr)	110-1300 (50-600)	220-3300 (100-1500)	330-4400 (150-2000)
